Subject: **New Inverter PCB Kit Numbers for DZ18VC 18 SEER Heat Pumps and DX/Z20VC 20 SEER Air Conditioners and Heat Pumps**

All new inverter PCB kits provided through Service Parts will require shared data to be field installed. It is necessary to flash the shared data to the PCB utilizing the [BTSDL01-D](#) shared data loader. This service tool eliminates the previously used shared data chips required to flash the board.

Service kits will continue to contain the necessary gaskets and thermal paste required for replacement installation. See the table below for the new programmed inverter PCB kit numbers.
